

Creating a custom tuition payment plan for *all* of your students is the right thing to do

TUITIONFlex™ makes it easy.

With the TuitionFlex Program, you can create a customized tuition payment program for students and families to help bridge their financial gap regardless of their financial needs.

Choosing a tuition payment plan that can assist your students at every financial level can be difficult. You want to ensure that your students and families are satisfied while still remaining in line with all Truth-In-Lending regulations.

Introducing a Flexible Solution for your Payment Needs

TuitionFlex is an online tuition payment program for schools who want an all-inclusive solution to enrollment and retention management. The innovative platform provides a streamlined and user-friendly application for both you and your students and the entire process can be **completed in just one easy session.**

The TuitionFlex Program provides schools with financing solutions that comply with *all* Truth-In-Lending regulations. All application forms, retail installment contracts, and required disclosures are generated within the online experience and are in full compliance with applicable federal regulations.

In addition, TuitionFlex offers numerous options that are tailored by your school to best meet the needs of your specific programs and students including:

- Minimum and maximum loan amounts
- Interest-free and interest bearing options
- Flexible repayment terms (up to 120 months) with fully-amortized or graduated payment schedules
- Built-in credit check with underwriting criteria set forth by your school should you decide to provide risk based pricing for your students (includes option for cosigners)

What else?

- Fast processing with a 100% online application
- Secure electronic signature process that adheres to all requirements set forth in the Electronic Signatures and Records Act
- School portal for submitting applications, managing certifications, monitoring application status and reporting
- Full audit trail of every transaction including date/time stamped document generation, email logs and electronic signatures
